PROFESSIONAL SUMMARY

Senior Frontend Engineer and **React.js Developer** with **4+ years** building responsive, high-performance web applications in **React.js**, **Next.js** and **TypeScript**. Current work spans the frontend of **Joyride**, a white-label micromobility platform for e-scooter and e-bike fleet operators: the operator dashboard, live fleet maps, ride analytics and the shared component library behind every screen. Seeking a **Senior Frontend Engineer** role on a product team building real-time, data-rich interfaces.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS / Sass

Frontend: React.js / ReactJS, Next.js / NextJS, SSR / SSG, React Hooks, Custom Hooks, Functional Components, React Router, Single Page Applications (SPA), Responsive Web Design, Cross-Browser Compatibility

State Management: Redux, Redux Toolkit, Context API

UI & Design Systems: Tailwind CSS, Material UI, Bootstrap, Storybook, Figma, Component Libraries, Accessibility

Architecture & Performance: Component Architecture, Reusable Components, Code Splitting, Lazy Loading, Dynamic Imports, Memoization, Bundle Optimization, Performance Optimization

APIs & Data: REST APIs, API Integration, JSON, JWT Authentication, Role-Based Access Control (RBAC), Real-Time Data, Map Integration, Data Visualization

Testing & Tools: Jest, Unit Testing, Component Testing, Debugging, Git, GitHub, Bitbucket, Webpack, Vite, npm, AWS (S3, CloudFront, CloudFormation, CloudWatch), Netlify, Jira, Confluence

Practices: Agile / Scrum, Version Control, Code Review, Sprint Planning, Mentorship, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Software Development Engineer (Frontend Lead), Techflitter Solutions Pvt. Ltd. **Jun 2022 - Present**
Joyride: white-label micromobility platform for e-scooter and e-bike fleet operators *Ahmedabad, India*

- **Lead frontend delivery** for the **operator dashboard**, covering feature scoping with product, sprint planning, **code review** and release checks, and setting the **component and coding standards** for a team of 2 engineers.
- Build the **live fleet map** and **ride analytics** views, using **map integration** and **real-time data** so operators can track e-scooters and e-bikes, vehicle locations and ride status as they change.
- Own the **shared component library** and **custom hooks**, documented in **Storybook**, which removed **35% of duplicated UI code** and keeps every Joyride screen consistent and accessible.
- Architect the client data layer: **Redux** state over a shared **REST API** layer, with **JWT authentication** and **role-based access control (RBAC)** so each operator role sees only its permitted screens and actions.
- Cut **bundle size and load time by 40%** with route-level **code splitting**, **lazy loading** and **memoization** of heavy map and chart components, and moved the build from Create React App to **Vite** for **75% faster** dev-server startup.
- Ship reliable releases on **AWS** (S3, CloudFront, CloudFormation, CloudWatch) with **Jest** component and functional tests, and partnered with UX/UI designers on user-flow changes that lifted **conversion by 25%**.

Associate Software Developer (Internship), Zest Brains Pvt. Ltd. **Jan 2022 - May 2022**
Web and mobile application development *Ahmedabad, India*

- Built responsive, client-facing UIs in **React.js** from **Figma** designs, as **reusable components** that sped up delivery.
- Collaborated with design and QA to debug existing **React applications** and fix performance and cross-browser issues.

PROJECTS

Critiq, an AI Frontend Code Reviewer
Next.js | React | Claude API | Tailwind CSS
codelens-ai-dev.netlify.app

- Built with **Next.js** and the **Claude API** to review React files directly in the browser.
- Flags **performance, accessibility, security** and **React best-practice** issues, each tied to the exact line with a **one-click suggested fix**.

EDUCATION

Bachelor of Technology (B.Tech), Computer Engineering **2019 - 2022**
Aditya Silver Oak Institute of Technology, Ahmedabad, Gujarat, India | CGPA 8.49

Diploma, Computer Engineering **2016 - 2019**
Om Institute of Engineering & Technology, Junagadh, Gujarat, India | CGPA 8.05
